Profile

28 years old - Driving licence - French

Having recently moved to Dublin, I am now looking for a company that can provide a great team and Agile experience in a modern development workflow. I love code reviews, unit testing, automated builds and team happiness :)

After a two-year degree in software engineering, I have acquired a solid 6 years work experience centered around the web, mastering diverse frontend and backend technologies. I view myself as a generalist, being able to develop Android applications or React web frontends as well as PHP, Ruby or .Net backends. Passionate about open-source software, I like to try leading-edge technologies such as Rust or Elm and apply the lessons learned to my everyday code.

This CV is powered by React, Typescript, SCSS and built by Webpack.

Work experience

COMERSO

February 2018 - September 2019 (1 year 8 months)

Full Stack Developer (React, Android, .Net)

Java JS C# HTML/CSS • Android React .Net • SQLServer SQLite

Comerso's goal is to help retail and industry adopt a zero-waste strategy with a strong technological approach. Comerso provides multiple solutions to handle the end of life of retail products :

- Logistics to donate products to non-profit organizations
- Tools to help donate, track due dates and edit discounts for products
- A portal to monitor and manage the end of life of products

As a team of four developers we worked in a scrum environment, and built up a modern continuous integration workflow based on Azure DevOps. As a full stack developer, I worked on various applications :

- The REST API backend (C#, .Net, .Net Core)
- The internal administration frontend (React, Typescript)
- C-Stats customer portal (React, Typescript)
- Comerso android app, to track due dates and edit discounts for products
- GefMobile android app, to track logistics between retailers and non-profit endpoints

SILAMIR

January 2016 - March 2016 (3 months)

Full Stack Developer (PHP, Angular, Cordova)

PHP JS HTML/CSS • Bootstrap Angular Cordova • MySQL Solr

Implementation of a mobile app to display a catalog of products for a large aeronautics industrial company :

- PHP REST API to manage and query the catalog
- Cordova mobile app (Android and iOS) to view the catalog

CONCEPT

November 2015 - December 2015 (2 months)

Backend Developer (Ruby)

Ruby • Ruby on Rails • SQLServer

Implementation of a REST API for the company ITG using Ruby on Rails :

- User and client authentication
- Mapping of an existing SQL Server database
- Unit and functional testing

September 2015 - October 2015 (2 months)

Full Stack Developer (PHP, Javascript)

PHP JS HTML/CSS • Bootstrap jQuery • MySQL Solr

Implementation of a customer portal for the accounting company BDO :

- Dashboard with KPIs for agents and customers
- Integration of an existing EDM
- Messaging interface between agents and customers
- Timeline with actions to perform for the customers

April 2011 - May 2015 (4 years 2 months)

Full Stack Developer

PHP Java Ruby Python JS HTML/CSS • Symfony Rails Android • MySQL PostgreSQL SQLServer

Enterprise service around open source software :

- Web and Android applications development
- Custom plugin development for open-source software (OpenERP, Alfresco, OCS Inventory, GLPI, Redmine)
- Reporting (Talend, Pentaho)
- Trainings (OCS Inventory, GLPI)
- Member of the OCS Inventory core team

FACTOREX

🎓 Education

2008 - 2011

Two-year degree in Computer Science

At the Lannion Institue of Technology (France), with an emphasis on software engineering

2008

Science A-levels

With an emphasis on mathematics and engineering sciences
